Art Unit: 2651

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 16-20, drawn to a process for synchronizing the timing of a magnetic drive, classified in class 360, subclass 51.
 - II. Claims 8-15, drawn to a product patterned magnetic recording medium, classified in class 360, subclass 131.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product patterned magnetic recording medium can be used as a master in a contact transfer record copying process.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2651

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was not made to applicant's attorney to request an oral election to the above restriction requirement because of the complexity of the invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. A reply to this restriction requirement must be filed within one month from the date of this letter.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alan Faber whose telephone number is (703) 308-4816. The examiner can normally be reached on flextime (M-F).
